PROFESSIONAL SUMMARY

Fourth-year Software Engineering student at Arba Minch University with a 3.8/4.0 GPA and practical training in Python programming and Backend Web Development through the ALX Software Engineering Program. I enjoy learning through building personal projects and exploring different areas of software development. My current interests include full-stack web development, mobile application development, machine learning, and artificial intelligence. I am seeking a Software Engineering internship beginning in February 2027, where I can apply my knowledge, contribute to real projects, and continue growing as a developer.

EDUCATION

Arba Minch University

Bachelor of Science in Software Engineering

Expected Graduation: 2028

GPA: 3.8 / 4.0

Relevant Coursework

- Data Structures
- Object-Oriented Programming
- Database Systems
- Software Engineering

TECHNICAL SKILLS

Programming Languages

- Python
- JavaScript
- Java
- C++

Frontend Development

- HTML5
- CSS3
- React.js

Backend & Data Concepts

- Python Backend Development
- REST API Concepts
- Database Fundamentals
- Local Storage

Tools

- Git
- GitHub
- VS Code

- Web Development
- Machine Learning Fundamentals

PROJECTS

Yeha – Personalized Study Coach

Technologies: React.js, JavaScript, HTML, CSS, Local Storage

- Building a personalized study assistant that helps students understand their learning preferences and improve study habits.
- Developing interactive user interfaces and managing application data using React and browser storage.
- Designing features such as user profiles, study recommendations, history tracking, and personalized dashboards.
- Improving skills in frontend architecture, user experience design, and product development.

Find Your Soulmate

Technologies: Python

- Developed a dating-style application as a university project.
- Applied Object-Oriented Programming concepts including classes, inheritance, encapsulation, and modular design.
- Strengthened Python programming and problem-solving skills through project development.

Personal Website Projects

Technologies: HTML, CSS, React.js

- Built and designed responsive websites to practice frontend

TRAINING

ALX Software Engineering Program

Backend Web Development

Completed practical training covering:

- Python Programming
- Backend Development Concepts
- REST APIs
- Databases
- Git & GitHub
- Software Development Practices

LANGUAGES

- Amharic (Native)
- English (Professional Working Proficiency)

development skills.

- Applied React components and modern frontend development practices.
- Focused on improving user interface design and responsive layouts.

INTERESTS

- Full-Stack Web Development
- Artificial Intelligence
- Machine Learning
- Mobile Application Development
- Building Software Solutions for Real-World Problems
